In digital signal processing, downsampling and decimation are terms associated with the process of resampling in a multi-rate digital signal processing system.

Greetings. I would like to offer you my latest creation, an open source MIT-licensed C++ library for implementing IIR (Infinite Impulse Response) digital filters.

Sample-rate conversion is the process of changing the sampling rate of a discrete signal to obtain a new discrete representation of the underlying continuous signal. Application areas include image scaling and audio/visual systems, where different sampling rates may be used for engineering, economic, or historical reasons.
