

### Solution Manual Compiler Design Aho

A compiler implements a formal transformation from a high-level source program to a low-level target program. Compiler design can define an end to end solution or tackle a defined subset that interfaces with other compilation tools e.g. preprocessors, assemblers, linkers.

In compiler optimization, register allocation is the process of assigning a large number of target program variables onto a small number of CPU registers.

### Register allocation - Wikipedia

The name awk comes from the initials of its designers: Alfred V. Aho, Peter J. Weinberger, and Brian W. Kernighan. The original version of awk was written in 1977 at AT&T Bell Laboratories.
